## **DETAILED ACTION**

### ***Oath/Declaration***

The new Oath/Declaration filed on July 10<sup>th</sup>, 2006 is acknowledged and accepted by the examiner. The corresponding objections are hereby withdrawn.

### ***Drawings***

The amended drawings filed on July 10<sup>th</sup>, 2006 are acknowledged and accepted by the examiner. The corresponding objections are hereby withdrawn.

### ***Claim Objections***

The amendments to the claims filed on July 10<sup>th</sup>, 2006 are acknowledged and accepted by the examiner. The corresponding objections are hereby withdrawn.

### ***Claim Rejections - 35 USC § 112***

The amendments to the claims filed on July 10<sup>th</sup>, 2006 are acknowledged and accepted by the examiner. The corresponding rejections are hereby withdrawn.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-12 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Bohan et al (US Patent 5,279,539).

Bohan discloses (**Figure 7**): a pliable/flexible (**Column 5, Lines 41-45**) hollow cap or casing portion (**11**); a fastener portion provided at a lower portion of the cap or

Art Unit: 3733

casing; the fastener portion comprising a lower frame/cinch ring (21) which accept sutures (30, 31); the cinch ring (21) can be considered box-like given the broadest reasonable interpretation; Dictionary.com Unabridged Version 1.0.1 defines box as: *any enclosing, protective case or housing, sometimes including its contents*; the sutures (30, 31) are inherently capable of allowing the device to attach to instrumentation or to adjacent bone areas/tissues by placing the cap/casing portion (11) about instrumentation and then tightening the sutures (31, 35) causing the cap/casing to close circumferentially (horizontally or vertically depending on orientation).

### ***Response to Arguments***

Applicant's arguments filed July 10<sup>th</sup>, 2006 have been fully considered but they are not persuasive.

In response to applicant's argument that Bohan et al is not for bone repair or reconstruction by encapsulating parts of the instrumentation or providing a mechanical barrier for preventing ingrowth of bone, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In the instant case, it is clearly capable of encapsulating instrumentation. It is further capable of preventing ingrowth of bone, at least temporarily.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., capable of permanent implantation, made of GoreTex, Dacron, polyurethane) are

Art Unit: 3733

not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### **Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
